Problem Overview

Although many people want to stay healthy, **they rarely prioritize their health**, saying they don't have time, don't want to wait for the long-term benefits, or prefer to do other, more social, activities.

Solution Overview

We want a product that offers **meaningful social connection** and **immediate rewards** when users meet fitness and nutrition goals.

This should motivate people to be more excited about maintaining a healthy lifestyle, demonstrating that **the act itself - not the incentives - is worth prioritizing.**

Value Proposition

Inspiration to maintain a healthy lifestyle.

Results

Overview of
Revised
Design

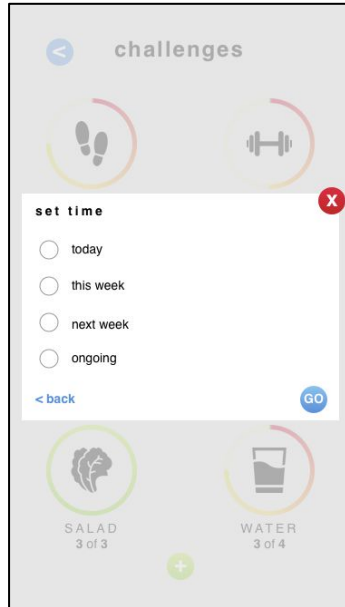

Prototype
Status

The background features a series of overlapping, angular shapes in various shades of green and teal. A large, dark teal shape forms a mountain-like peak on the left side. Below it, a wide band of medium teal stretches across the center. The bottom of the image is composed of several overlapping shapes in lighter and darker green tones, creating a layered, landscape-like effect.

Heuristic Evaluation and Revised Design

Violations, fixes, and takeaways

4- Visibility of System Status

At the time setting page, what time we are setting should be clearly notified.

- Is this time the due date?
- Is it the time we are supposed to start the activity?

Additionally, the deadlines of challenges are unclear.

- Does the user have to complete a week after they accept it or a week after they receive it?

4- Match Between System and Real World

What the challenges are supposed to involve is a bit unclear.

On the homescreen, for instance, there's a symbol representing a challenge to walk 4 times this week, but there is no information about how far the user is expected to walk.

Fixing Severity 4s

add running challenge

1 mi. 5 times this week

(2.5 mi. total this week)

distance	time
0.5	60

- ◆ Remove “set time” screen
- ◆ Make all challenges weekly
- ◆ Define challenges in terms of distance (if applicable) or time

Fixing Severity 4s

- ◆ Track progress in terms of what you do
- ◆ Standardize challenge deadlines
- ◆ Better way of displaying progress
 - ◆ Easier for scheduling
 - ◆ Easier for understanding
 - ◆ Easier for keeping track

Severity 3

- ◆ How do you receive, accept, or reject challenges/friends?
 - ◆ Visibility of System Status
- ◆ What is the green button for on the social page?
 - ◆ Consistency and Standards
- ◆ How do you incentivize health without a defined rewards system?
 - ◆ Aesthetic and Minimalist Design
- ◆ What happens if a challenge is failed?
 - ◆ Help and Documentation
- ◆ Why isn't there a way to see what options a user has chosen while creating a new challenge?
 - ◆ Visibility of System Status

Severity 3

- ◆ How do you receive, accept, or reject challenges/friends?
- ◆ What is the green button for on the social page?
- ◆ How do you incentivize health without a defined rewards system?
- ◆ What happens if a challenge is failed?
- ◆ Why isn't there a way to see what opens a user has chosen while creating a new challenge?

Severity 3

- ◆ How do you receive, accept, or reject challenges/friends?
- ◆ What is the green button for on the social page?
- ◆ **How do you incentivize health without a defined rewards system?**
- ◆ What happens if a challenge is failed?
- ◆ Why isn't there a way to see what opens a user has chosen while creating a new challenge?

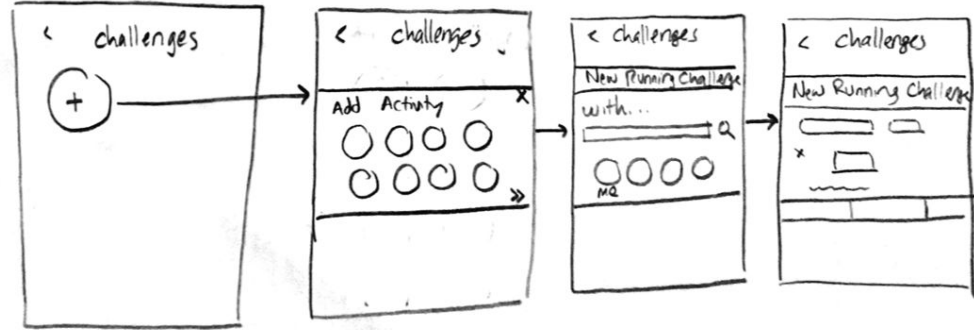

Severity 3

- ◆ How do you receive, accept, or reject challenges/friends?
- ◆ What is the green button for on the social page?
- ◆ **How do you incentivize health without a defined rewards system?**
- ◆ **What happens if a challenge is failed?**
- ◆ Why isn't there a way to see what opens a user has chosen while creating a new challenge?

Severity 3

- ◆ How do you receive, accept, or reject challenges/friends?
- ◆ What is the green button for on the social page?
- ◆ How do you incentivize health without a defined rewards system?
- ◆ What happens if a challenge is failed?
- ◆ **Why isn't there a way to see what opens a user has chosen while creating a new challenge?**

Takeaways

- ◆ Simplify many features
 - ◆ Give users more visual information
 - ◆ Make tasks even simpler and more intuitive
- ◆ Narrow target audience
 - ◆ Focus on audience that wants to get into exercising
 - ◆ Cater less to experienced user

Prototype Status

Progress and planning

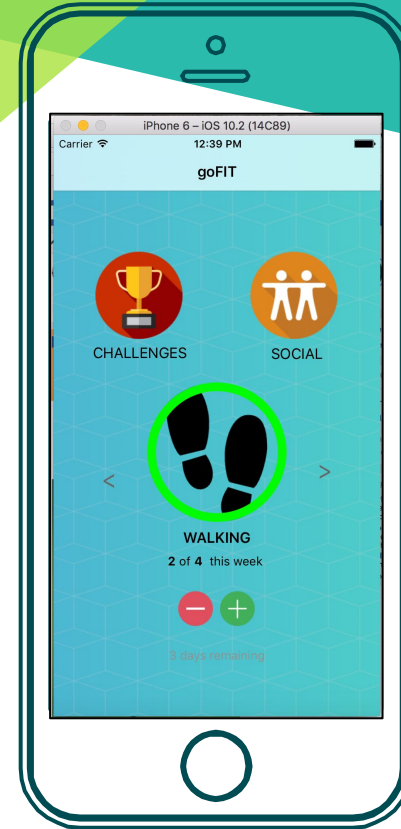

Tools

- ◆ Xcode to build the prototype
- ◆ All additional Xcode features
 - ◆ iOS simulator
 - ◆ Apple's libraries for building UI's
 - ◆ Swift

Progress towards completion

- ◆ Current features
 - ◆ Main structure/skeleton
 - ◆ Task: Create a challenge
- ◆ Plan going forward
 - ◆ Task: Log progress
 - ◆ Task: Challenge friends
 - ◆ Focus more on UI
 - ◆ Incorporate changes made from feedback
 - ◆ Fine tune details and aesthetic

Wizard of Oz and Hard-Coded Elements

- ◆ Current friends list
- ◆ Challenges available to add
- ◆ Cannot scroll through users
- ◆ Database (history and stats) will likely be hardcoded

Demonstration

Featuring our current prototype

Recorded Demo

- Definitely a prototype
- Haven't fully incorporated all the design changes I've mentioned just now

The results of our heuristic evaluation allowed us to make **design changes** that focus on a **more specific target audience**.

We're on our way towards **implementing** our final design and crafting an **aesthetic** that falls in line with our **overall vision**.

Thanks!

Any questions?
